

■■ APEX AI Automated Penetration Test Report

Generated on 2026-10-08 15:10:42 | Target: http://127.0.0.1:5000/

Target Host:	http://127.0.0.1:5000/	Overall Risk Level:	HIGH
Vulnerabilities Found:	2 confirmed issue(s)	Endpoints Discovered:	2 endpoints

Detailed Security Findings

Vulnerability Type	Target Endpoint	Parameter	Confidence	Validation Technique
Reflected XSS	http://127.0.0.1:5000/search	q	90%	unescaped_tag_reflection
DOM XSS	http://127.0.0.1:5000/?callback=hello	callback	85%	dom_xss_innerhtml

Remediation & Technical Evidence

Finding #1: Reflected XSS

URL:	http://127.0.0.1:5000/search
Parameter:	q
Payload:	alert(1)
Validation:	unescaped_tag_reflection
Remediation:	Context-aware output encoding (e.g. htmlspecialchars / textContent). Avoid passing untrusted input into innerHTML, eval(), or document.write(). Implement strict Content Security Policy (CSP).

Finding #2: DOM XSS

URL:	http://127.0.0.1:5000/?callback=hello
Parameter:	callback
Payload:	alert(1)
Validation:	dom_xss_innerhtml
Remediation:	Context-aware output encoding (e.g. htmlspecialchars / textContent). Avoid passing untrusted input into innerHTML, eval(), or document.write(). Implement strict Content Security Policy (CSP).
